> Science and Research

Decades of Success The TAKUMI Philosophy

- > Independent brand – independent product line since 2005

- > Focus on Die & Mold
H Series | G Series

- > Surface finish
Built for high-precision parts with excellent surface finish

- > Accuracy
Robust and rigid double column design promotes high thermal stability

- > Direct drives in X / Y / Z
Direct drive 24,000 rpm spindles

- > Since 2016 sales and customer support through the established HURCO network

! High Machine Availability

The Plus in Equipment The TAKUMI High Speed Bridge Type Machining Centers

Preconfigured machines:

- > Heidenhain control
- > 15,000 rpm spindle
- > Linear scales
- > CTS
- > Electronic thermal compensation
- > 30-station tool changer

Source HEIDENHAIN

H7 / H10 models

Compact design

Travels X/Y/Z (mm)	up to 1,020 x 700 x 500
Table dimensions (mm)	up to 1,050 x 700
Table load max. (kg)	up to 800

G700 / G1000 models

Ideal for machining graphite

Travels X/Y/Z (mm)	up to 1,020 x 700 x 500
Rapid traverse (m/min)	up to 32 x 32 x 32
Table load max. (kg)	up to 800

H12 / H13 / H16 models

Universal and dynamic

Travels X/Y/Z (mm)	up to 1,600 x 1,300 x 700
Table dimensions (mm)	up to 1,900 x 1,300
Table load max. (kg)	up to 6,000

H22 / H32 models

For high demands

Travels X/Y/Z (mm)	up to 3,200 x 2,250 x 800
Table dimensions (mm)	up to 3,320 x 2,100
Table load max. (kg)	up to 8,500
